M. Gökhan Halici	Machiel E. Noordeloos	Guo-Zhu Zhao
Nils Hallenberg	Lorelei L. Norvell	Wen-Ying Zhuang
	Todd W. Osmundson	

FOUR EASY STEPS TO SUCCESSFUL MYCOTAXON PUBLICATION

MYCOTAXON's complete instructions, which were last updated in November, 2007, are posted on the INSTRUCTIONS TO AUTHORS page on the MYCOTAXON website listed below. Prospective authors should download instructions PDF, expert reviewer comment and submission forms, and helpful templates by clicking the 'file download page' link on the instructions page before preparing a paper intending for the journal. Below is a summary of our simple '4-step' publication process.

Step 1—PEER REVIEW: Authors send a formatted text document with illustration files and MYCOTAXON Reviewer Comments Form to two experts for peer review. Authors should (i) make certain that both peer reviewers have Emailed the comment forms to the *Editor-in-Chief* <editor@mycotaxon.com> and (ii) revise their manuscript according to reviewer suggestions **before** submitting a master text file to the *Nomenclature Editor* for nomenclatural review.

Step 2—NOMENCLATURAL & FRENCH LANGUAGE REVIEW: Authors next Email their revised master text file (containing footnotes, tables and captions but **NO** illustrations) to the *Nomenclature Editor* <PennycookS@LandcareResearch.co.nz> for accession and pre-submission review. The Email message **MUST** include the word 'MYCOTAXON' on the subject line and **MUST** include names and Email addresses of all peer reviewers. (Manuscripts written in French should also be submitted to the *French Language Editor* <decock@mbla.ucl.ac.be> at this time.) Editors will return annotated files with a list of needed corrections to the authors and *Editor-in-Chief*.

Step 3—FINAL SUBMISSION: After authors receive their manuscript accession number and make revisions requested during nomenclatural review, they should send (i) a completed MYCOTAXON submission form; (ii) separate text files for main text, tables, and legends; and (iii) art files to the *Editor-in-Chief* <editor@mycotaxon.com>. **Only** text and image files considered ready for immediate publication should be sent at this time. The *Editor-in-Chief* will try to acknowledge receipt of files within two weeks. Authors are asked to wait at least 14 days before sending a follow-up query, to avoid unnecessary Email traffic near press deadlines or during temporary closures of the editorial office.

Step 4—PRESS PREPARATION: After preparing a press-quality PDF from the author's text and art files, the *Editor-in-Chief* sends journal entries for the nomenclatural novelties and author index pages with the PDF proof to all coauthors for approval. Editorial errors are always corrected free of charge, but authors who ask the *Editor-in-Chief* to correct errors present in their original files will be charged \$10 per correction (minimum charge of \$40). Payment arrangements of all fees should be made by writing the *Business Manager* <subscriptions@mycotaxon.com>.

MYCOTAXON frequently updates its webpages and regularly posts abstracts, table of contents, indices, distributional checklists, and revised instructions and forms on its website. We invite all of you to browse our website frequently for updated journal and other interesting mycological news.

FROM THE *EDITOR-IN-CHIEF*

TO OUR READERS

SIC TRANSIT BOOK REVIEW EDITOR — Finishing a full decade of service to our journal, DAVID HAWKSWORTH departs MYCOTAXON after shepherding a formidable opus (pp. 509–562) comprising excellent critiques of 44 books running the gamut from the 50-page MONTANE HEALTHLAND LICHEN GUIDE to the 1046-page LICHENS OF GREAT BRITAIN AND IRELAND while mother-henning the DICTIONARY OF FUNGI–*Phytophthora*–FUNGA NORDICA–*Alternaria*—TL2 gamut in-between. We gratefully thank ‘Sir’ David (a pet name for our obliging colleague, even if that title is not in the official CBE nomenclatural pantheon), wish him well in his current passion of forensic mycology, and anticipate the future reviews that will flow from his prolific pen.

ELSE VELLINGA will join the MYCOTAXON masthead in 2010 as solitary Book Review Editor (not ‘co’-editor, as speculated in our last volume). With considerable editorial persuasion and after mulling the logistics of publishers sending volumes to two different editors, Dr. Vellinga agreed to assume the post with the blessings of her predecessor. Else brings formidable knowledge of taxonomy and nomenclature to her new position. Morphologically and nomenclaturally trained in the Netherlands, she has helped edit the FLORA AGARICINA NEERLANDICA series. Molecularly tempered in the UC-Berkeley Bruns’ lab, she now spearheads a careful revision of many difficult agaricaceous ‘mega’-genera. Finally, as author of MCILVAINEA’s well-received “Mycological Florilegium” for the past few years, Else has published an entertaining expert overview of recent important mycological journal papers. We welcome Else with considerable enthusiasm and invite those interested in obtaining or writing book reviews to contact her at (ecvellinga@comcast.net) or 861 Keeler Avenue, Berkeley CA 94708 U.S.A.

MYCOTAXON 110 — Our final 2009 volume of 580 pages contains 62 papers by 190 authors & co-authors representing 36 countries and assisted by 86 expert reviewers. There are 133 new fungal names proposed. With 2009 accessions standing at 244 on December 10 and with more new manuscripts arriving daily, 35 of the 70 remaining unpublished manuscripts are already approved for Mycotaxon 111.

As always, the drawings submitted by our authors demonstrate the renaissance stature of today’s scientists. Twelve mycological and editorial advisors were polled to select the cover for this issue, and the decision was — as usual — quite difficult. Three color plates vibrantly illustrate a new *Racocetra* species (pp. 203 & 207) from Benin (Africa) and a rare *Xeromphalina* (p. 249) that has vaulted from Spain across Europe to Macedonia and Turkey.

The journal’s new formal NOMENCLATURE SECTION begins with a formal report on the deliberations of the Nomenclature Committee for *Fungi* and concludes with a rousing opinion regarding the (un)workability of a new mycological Code. Enjoy!

Warm regards,

Lorelei L. Norvell

EDITED BY RICHARD P. KORF, WITH A FOREWORD BY TENG'S DAUGHTER, ROSALINE Z. DENG.

Proceeds from sales go to the Teng family.

Special for *Mycotaxon* subscribers: deduct \$20 from regular price!

WHAT REVIEWERS SAY ABOUT TENG'S FUNGI OF CHINA:

"... one of the most valuable books on the fungi of China ever published in English." —*Mycologia* 90: 1091-1092, 1998.

"... a great big blue uncompromising brick of a book ... an instant classic. Anyone interested in identification of fungi, particularly in Asia, should get this book immediately. Mycology owes another debt to Dick Korf for his sympathetic and intelligent editing of this superb work." —*Bibliography of Systematic Mycology* 10(6): xlviii-xlix. 1998.

"The book is important for any researcher interested in the systematic relationships, diversity, and distribution of fungi on a global scale." - *New Zealand Journal of Botany* 35: 265-266. 1977.

Fungi of Northwestern China, EDITED BY WEN-YING ZHUANG

Mycotaxon, Ltd. 2005. Hardbound, 430 pp., 26 x 18.5 cm. US\$40.00 plus postage. ISBN 0-930845-14-5.

(Please order direct from Wen-Ying Zhuang, PO Box 2714, Beijing 100080, China; zhuangwy@sun.im.ac.cn).

Some 3887 named species belonging to 759 genera of fungi (slime molds, plasmodiophoromycetes, chytrid, oomycetes, zygomycetes, lichens, non-lichenized ascomycetes, anamorphic fungi, rusts, smuts, and the basidiomycetous macrofungi) hitherto known from Gansu, Ningxia, Qinghai, Shaanxi and Xinjiang, China are listed.

Useful references, detailed tropical distribution, and hosts or substrates are provided for each species.

CONTRIBUTING AUTHORS: Shuang-Lin Chen, Lin Guo, Shou-Yu Guo, Ying-Lan Guo, Shu-Xiao Sun, Shu-Xia Wei, Hua-An Wen, Xiao-Qing Zhang, Jian-Yun Zhuang & Wen-Ying Zhuang.

Higher Fungi of Tropical China, EDITED BY WEN-YING ZHUANG

Mycotaxon, Ltd. 2001. Cloth bound, 485 pp., 26 x 18.5 cm. US\$50.00 plus postage. ISBN 0-930845-13-7.

(Please order direct from Wen-Ying Zhuang, PO Box 2714, Beijing 100080, China; zhuangwy@sun.im.ac.cn).

Some 5056 named species belonging to 1192 genera of higher fungi hitherto known from tropical China are listed.

Useful references, detailed tropical distribution, and hosts or substrates are provided for each species.

CONTRIBUTING AUTHORS: Lin Gou, Shou-Yu Guo, Ying-Lan Guo, Xiao-Lan Mao, Shu-Xiao Sun, Shu-Xia Wei, Hua-An Wen, Zhi-He Yu, Xiao-Qing Zhang, Jian-Yun Zhuang & Wen-Ying Zhuang.
